Max

Boat Less, Fish More

Fisherman Max is SwellPro's top-of-the-line fishing drone that can deliver 8 lbs / 3.7 kg baits to deeper waters or inaccessible areas. Without the hassles of kayak or bait boat, Fisherman Max allows pro anglers to spend more time and energy fighting the giant fish, and catch as many big fish as they can in a day.

**8 lbs / 3.7 KG

Calibration-free

Drone-Cast For Greater Success

How Fishermen Max works?

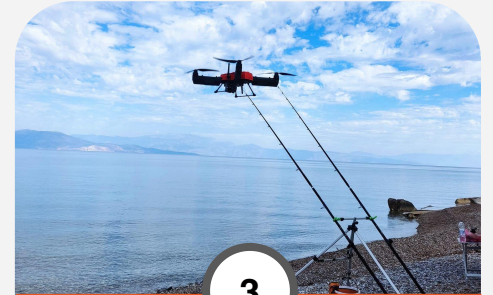

1

Set up the drone. No calibration needed.

2

Attach baited line into the release mechanism.

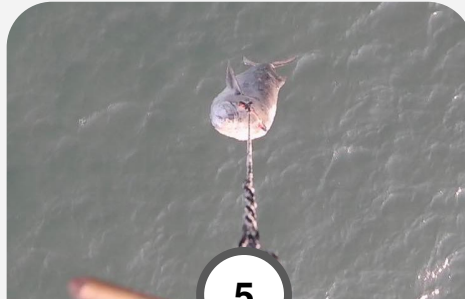

3

Take off the drone and fly into the ocean.

4

Watch the drone's footage on the display.

5

Hit a button to release the bait at target spot.

6

Hit another button, drone return to the beach.

8 LBS

3.7 KG

Bait Capacity

No other drones can match propulsion design of Fisherman Max. Max can fly stably while carrying 3.7 kg or 8 pounds baits over 600 yards. That means pro anglers can fly big live bait or large chunk of meat to attract bigger fish or specific species.

6 Drops

Per Charge

Fisherman Max boasts unmatched power-efficiency across the industry. On one single battery charge, anglers can have up to 6 bait drops over 400 meters / 437 yards, each with 2 kg / 4 lbs baits. Deploy multiple baits into the ocean and skyrocket your fishing success like never before.

Who needs a boat anymore?

300% Faster

Lugging around a heavy kayak is a thing of the past, neither do you need to paddle baits out hundreds of meters. You can set up Fisherman Max and fly over 600 yards in a fraction of time, saving more time and energy for fighting the fish of lifetime.

100% Safe

Kayak fishing can put your life in dangers such as capsizing or drowning. Fishing with Fisherman Max, you don't need to be soaked on the water and can fish in tough weather conditions. Stay dry, comfortable and 100% safe at the beach while waiting for the fish to come to you.

**Drone-Cast
with More Confidence**

Calibration-free

Fisherman Max is factory-calibrated and doesn't require re-calibration. The drone can fly stably without calibration on any beach of the world.

Auto-drop & Return

Fisherman Max can automatically release the baits and return to the shore when the battery reaches a specific low threshold or a loss of signal occurs.

Overload Alert *Coming soon...*

The Max's remote control can immediately send out voice alerts when the weight of the baits exceed the max lift capacity of the aircraft.

GPS 9.0

With the latest 9th-gen GPS, Fisherman Max can receive up to 30 satellites for rock-solid flight stability and improved hovering precision.

Pendulum-free

The flight controller of Max is fine-tuned to increase stability and reduce pendulum effect while the drone is carrying a swaying baited line.

IP67 Saltwater-proof

A waterproof housing and waterproof motors protects the Fisherman Max from saltwater damage when in or around the ocean. The battery compartment has a 100% watertight rubber seal to further protect the electronics when the battery is installed.

Floating Devices

Fisherman Max comes with 4 floating bars that can be attached to the arms to provide buoyancy when landing on the water. Alternatively, a lightweight self-inflating buoy can be installed to keep the drone afloat upon contact with water.

Level 6 Wind Resistance

Thanks to industrial-leading propulsion system, Fisherman Max has tremendous power to not only lift big baits, but we designed it to also fly safely in strong ocean winds of up to 40 mph (18m/s), providing you greater control and comfort. Who said you cannot catch fish on a windy day?

**Drone-Cast
with 100% Accuracy**

4K Fishing Camera

For Advanced Version

The Fisherman Max advanced version is pre-installed with a waterproof stabilized 4K camera for shooting smooth detail-rich footage. The lens can be tilt up and down via the remote controller, allowing you to see when and where the bait is released.

For Advanced Version

Multi-Color Display

The remote controller of Fisherman Max advanced version comes with an inbuilt 5" multi-color LCD display which can instantly show the drone's footage in 720P. From the screen, you can also read the aircraft status including GPS coordinates, altitude, battery voltage and more. The controller can alert you to potential risks with voice prompts. Get full control of the drone without using your phone.

Beach Reading

Pro anglers can read the waves and tides from Fisherman Max's footage to identify structures such as sandbars, troughs, drop-offs, and channels. Dropping baits where the fish are congregating can increase your chances of catching that trophy fish.

Fish Finding

When the water is clear enough, you can even locate fish or fish schools on the surface from the high-quality drone footage, at a fraction cost and time of boat. Drop baits where the fish are - maximize fishing success and minimizing gear waste.

Drone-cast on The Map

The FDFly APP enable several autopilot features on the Fisherman Max. That makes it even easier for anglers who have no piloting experiences to fly baits out to their desired location.

Auto Take-off

Slide to activate the drone and take it off

Tap-to-Fly

Fly to the location you tap on the APP

Fishing Spot Saving

Remember GPS points of favorite fishing spots

Auto-Fish

Automatically drop baits at saved locations

Portable Design

Fisherman Max can fold up its arms and easily fit into a small carry case or your fishing cart. The arms and propellers are both made from carbon fiber for reduced weight yet increased stiffness. Its compact and lightweight design makes it much easier to transport to the beach than other similar sized drones.
