WHO WE ARE?

ABOUT SWELLPRO

Innovation in Waterproof Technology

SwellPro is recognized as the pioneer that introduced the world's first waterproof and rugged UAV systems. Since its inception in 2015, SwellPro has been at the forefront of designing and manufacturing drones and accessories that defy the limits imposed by water and harsh weather conditions, empowering users to capture stunning aerial footage and perform critical tasks where traditional drones would falter.

Game-changer in Saltwater Fishing

In the angling community, SwellPro's drones have revolutionized the game for those fishermen seeking alternatives to traditional boating. With these fishing drones, anglers can now cast their lines far into deep-sea territories right from the shore, hooking impressive catches that were once out of reach. Beyond robust waterproofing, these drones boast a hefty payload capacity, crystal-clear cameras, and pinpoint GPS navigation, making them indispensable for finding the best fishing spots and significantly boosting the odds of a bountiful haul.

Versatility in Multiple Industries

SwellPro have also found a place in sectors that require robust drones for operations such as search and rescue missions, maritime surveillance, marine biology research, and goods delivery. The ability to integrate a range of accessories and payloads makes these drones a multifunctional platform capable of adapting to needs in a multitude of commercial and industrial tasks.

R&D CAPABILITIES

Custom Flight Controller

SwellPro designs its own flight controllers to guarantee the highest level of stability and responsiveness. This customization is crucial for adapting our drones to the specific needs of users in various tasks and environments.

Industry-Only Waterproofing Technology

SwellPro's boasts proprietary techniques of sealing and coating, and corrosion-resistant materials. The fully waterproof design ensures that drones and accessories can resist water and are buoyant enough to float on the water, prolonging the drone's service life.

Integration with Third-party Technologies

SwellPro's openness to integrating third-party technologies allow users to access a wide range of tools and apps that can enhance the drone's capabilities and add cutting-edge features without needing to completely redesign the drones.

Safety and Reliability Engineering

SwellPro harnesses the latest in aerodynamic research to deliver unparalleled efficiency and optimal thrust-to-weight ratios in their drones. By flawlessly merging sophisticated flight sensors with a robust redundancy system, SwellPro significantly reduces the likelihood of in-flight mishaps, thereby enhancing the overall safety of their drones.

MEDIA TESTIMONIALS

"The SplashDrone 3 is the Aquaman of drones."

"This luxury waterproof drone is disrupting fishing and fun."

"Waterproof and air-cleaning drones fly high at IFA"

"The best drone for fishing in 2024"

"The world's first drone that can go underwater like a submarine"

"The Spry+ gives pilots the freedom to fly and skip over water capturing unique shots of boats and watersports."

MILESTONES

2014

Mariner, 1st-gen waterproof drone launched.

2015

SplashDrone launched on Kickstarter. SwellPro Founded.

2017

SplashDrone 3 launched on Kickstarter.

2016

SplashDrone 2 launched on IFA.

2018

Spry, first waterproof sports drone, launched on Kickstarter.

2019

Spry + launched

2020

SplashDrone 3+ launched.

2023

FD2 & FD3 fishing drones launched.

2021

SplashDrone 4 & FD1 launched.

DRONE FISHING

HOW SWELLPRO REVOLUTIONIZED FISHING?

Catch Bigger Fish

SwellPro can safely deliver giant bait of up to 8 lbs to target large game fish in deep waters.

Increased Success Rate

SwellPro extends casting distance, allowing fisherman to catch more fish in fewer hours with less gear wastes.

Precise Bait Delivery

Precise placement of bait in targeted locations enhances the likelihood of attracting desired fish species.

Time Saving

SwellPro are quick to set up and easy to operate. The drone can fly over 700 yards away in just 1 minute, saving anglers more time than boating.

100% Safe

SwellPro can be operated from the shore or a boat, reducing the need to wade through rough waters or navigate dangerous currents.

Offshore Fish Scouting

The high-resolution drone camera can help anglers scout vast areas of water from above and locate schools of fish, without having to move the boat.

FISHERMAN MAX (FD2)

The Fisherman Max, SwellPro's premier fishing drone, is engineered to carry baits weighing up to 8 lbs / 3.7 kg to distant waters or spots unreachable by traditional methods. Eliminating the need for cumbersome kayaks or bait boats, the Fisherman Max empowers avid fishermen to dedicate their effort and time to battling large game fish and maximize their daily haul.

FISHERMAN MAX (FD3)

The Fisherman FD3 stands out as SwellPro's most user-friendly waterproof fishing drone, equipped with a camera and bait release feature, tailored for fishermen across all skill levels. The FD3 empowers shore anglers to propel their baits well beyond the crashing surf, enabling them to hook prize fish more swiftly than before.

FDfly APP

DRONE-CAST AT YOUR FINGERTIPS

The FDfly APP enhances the Fisherman Max and FD3 with a suite of autopilot capabilities, simplifying the process for shore anglers lacking piloting experience to effortlessly transport their baits to the chosen spot. This application transforms the drone flying experience, making it more accessible and user-friendly for those new to the practice.

Auto Take-off

Slide to activate the motors and take off the drone.

Fishing Spot Saving

Remember GPS points of favorite fishing spots on the map.

Auto-Fish

Automatically navigate to saved locations and drop baits.

FISHERMAN FD1+

The SwellPro Fisherman FD1+ is an entry-level waterproof fishing drone specifically designed for those who are new to drone fishing. Without the complexities of an onboard camera and live view screen, FD1+ strips back to its most essential job – taking your bait where it's never gone before, making it the most cost-effective option on the market.

SPLASHDRONE 4+

SplashDrone 4+, SwellPro's latest innovation in waterproof technology, is an all-new, all-terrain, all-digital waterproof flight & floating platform, engineered to operate reliably in the most challenging environment. This latest model features the S6 flight controller, a new digital transmitter for better interference-resistance, and an all-in-one remote controller. With these upgrades, your mission is going to hit a whole new level of efficiency and success.

PAYLOADS

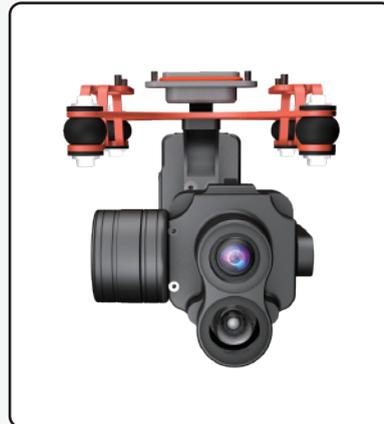

GC3-T Dual-sensor Thermal Camera

- Thermal sensor: Uncooled VOx Microbolometer, 640 x 512 @50FPS
- Visual sensor: 1/2" 2M starlight night vision CMOS, 1920*1080@50fps
- Built-in 10W dimmable LED flashlight
- 3-axis gimbal stabilization
- IP67 waterproof

GC3-S 4K Camera

- 1/2.3" 12M SONY CMOS
- UP to 4K / 30fps video
- 3-axis Gimbal Stabilization
- IP67 Waterproof

GC2-S FHD Low-light Camera

- 1/2" 2M starlight night vision CMOS
- UP to 1080P / 60fps video
- Built-in 10W dimmable LED flashlight
- 2-axis gimbal stabilization
- IP67 Waterproof

PAYLOADS

PLI-S Payload Release Mechanism

PLI-S enables SplashDrone 4+ to effortlessly deliver objects to remote areas with pinpoint accuracy and unprecedented efficiency.

MPE Megaphone

MPE turns SplashDrone 4+ into mobile broadcasting units, capable of delivering live or pre-recorded messages with sound volume of up to 120 decibel and high fidelity sound reproduction.

Dronar Sonar Detector

Dronar can map underwater topography, locate objects, and even detect fish beneath the water surface at a depth range of up to 40 meters, effortlessly integrating with SplashDrone 4+ to provide real-time, high-resolution underwater imaging.

Aquatic Filming

With SplashDrone 4+ and the GC3-S camera, filmmakers, photographers, boat owners and watersports enthusiasts can capture stunning over-water shots in aquatic environments without worrying about damaging their equipment.

Search and Rescue

Thanks to the 4K camera and thermal imaging camera, SplashDrone 4+ allows emergency responders to quickly locate individuals in distress, deliver life-saving equipment, or assess situations before deploying human rescuers.

Drone Delivery

With high payload capacity and the payload release mechanism, both SplashDrone 4+ and the Fisherman Max ensures precise and safe delivery of your package to remote areas. The onboard high-precision GPS system guarantees pinpoint accuracy in navigation.

Marine Wildlife Research

Scientists use SplashDrone 4+ to safely collect data and capture images in marine habitats without disturbing the ecosystem. The drone's payload release mechanism further allows for the deployment of sensors and sampling devices directly into the water

Infrastructure Inspection

SplashDrone 4+ can fly around a ship or oil rigs to identify defects without having a person climbing up scaffolding. The live video feed allow seaman to diagnose and fix the defects while at sea with a substantial reduction in time and cost than any traditional methods.

Maritime Surveillance

Coast guards use SplashDrone 4+ to gain a vantage point in identifying and intercepting unauthorized entry, smuggling, piracy, trafficking and other illegal activities in a restricted area of the ocean, enhancing situational awareness and response capabilities in the vast maritime domain.

BECOME A DEALER

SwellPro is actively expanding its global presence and seeks to partner with passionate businesses interested in joining its network of dealers and distributors.

Benefits for SwellPro Dealers

- Innovative products and proprietary technologies.
- Global brand recognition and reputation.
- Professional product training and support.
- Massive unsaturated market opportunities.
- Local inventory and shipping available.
- Local product replacement and repairing available.
